

Needle-free Safety Syringe Injector

What is Lenis?

Latin for "Soft in"

The **Lenis** is a compact injection system that delivers liquid medications or supplements by creating a **narrow precise fluid stream** that penetrates the skin and **eliminates the need for a needle**. The fine as hair liquid jet stream is produced with **high pressure spring power** through a micro-orifice at the end of the safety syringe, allowing the medication to penetrate and disperse below the skin or in the muscle, in a fraction of a second. The Lenis system delivers between 0.1-0.5 ml of liquid medication by SUB-Q or IM injection, and can be administered by a medical practitioner, individual or caregiver with ease.

Lenis Benefits

- ♦ **Easy** : *Easy to administer, ergonomic design*
- ♦ **Safe**: *No needles = No needle-stick injuries, No need for "sharps" hazardous disposal*
- ♦ **Comfortable**: *Minimizes injection-associated fear and anxiety, reduce injection site pain and tensing from anticipated needle pain*
- ♦ **Cost-Effective**: *Durable, no external power source required, no sharp waste disposal*
- ♦ **Convenient**: Small size, light weight

The Lenis **Needle-Free Safety Syringe** Injection Device is sold as a complete starter kit containing the needle-free injector device, loader, five (5) sterilized needle-free (0.5 ml) safety syringes, and one (1) sterile adaptor. The sterile disposable sterile components are sold separately with the ability to auto re-order.
